DETAILED ACTION

Claims 1-19 are pending and subject to restriction.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 10, 13-19, drawn to a first method, a method of treating a subject with sickle cell disease comprising administering an antiviral agent, classified in class 514, subclass ? depending on the treatment agent.
- II. Claims 2-4, 8, 9, 12, drawn to a second method, a method of inhibiting polymerization of hemoglobin comprising contacting the hemoglobin with an antiviral agent, classified in class 436, subclass 66.
- III. Claims 5 and 11, drawn to a third method, a method of determining whether an antiviral agent is capable of treating a subject afflicted with sickle cell disease, classified in class 436, subclass 8.
- IV. Claim 6, drawn to a fourth method, a method of determining whether an antiviral agent is capable of inhibiting sickling of a cell, classified in class 435, subclass 7.8.
- V. Claim 7, drawn to a fifth method, a method of determining whether an antiviral agent is capable of inhibiting the polymerization of hemoglobin, classified in class 436, subclass 66.

This application contains claims directed to the following patentably distinct species of the claimed invention: acyclovir and valacyclovir.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 2, 4-7 are generic.

Art Unit: 1651

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

The inventions are distinct, each from the other because of the following reasons:

The processes are distinct from one another because they recite different and distinct steps which lead to different and distinct products.

The several inventions listed above are independent and distinct from one another as they have acquired a separate status in the art and require independent searches, particularly with regard to the literature searches. Clearly, a reference which would anticipate one of the above groups would not necessarily anticipate or even make obvious any of the others.

An undue burden would ensue from the examination of multiple methods which have distinct steps and end points. Burden lies not only in the search of US Patents, but in the search for literature and foreign patents and examination of the claim language and specification for compliance with the statutes concerning new matter, distinctness and scope of enablement.

Art Unit: 1651

Because these inventions are distinct for the reasons given above restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
